NON-FINAL REJECTION

Status of the Claims

Claims 1-14 are rejected under 35 USC §112, second paragraph.

Rejections under 35 USC §112, second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of the claims specifically recite a method, while the body of the claims only describe functional blocks, resulting in method without steps. This renders the claim indefinite as to what is actually being claimed. Applicant is required to either amend the claims to perform clear and positively recited steps or amend the claims to be directed toward a system with clearly defined elements.

Applicant is further advised, that should the claims be written in system form, they would fail to comply with the 35 USC §101 guidelines concerning statutory subject matter.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

The claims themselves are written in a confusing and non-concise manner which prevents a reasonable prior art search or the application of prior art. A thorough search of the prior art will be performed and the results applied as necessitated by the amended claims.
